

Coupon

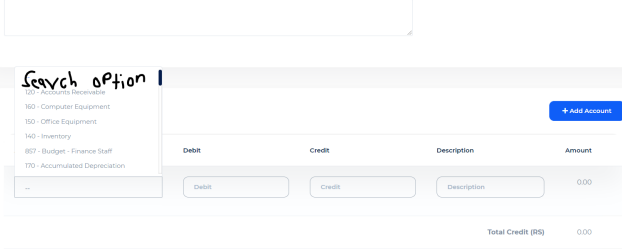

Add a one-time-use coupon and display the names of customers who utilize it.

Create New Customerr

When adding a new client, provide the option to enter the customer's VAT/ PAN number, which will be displayed on the invoice as well.

Search Features in drop downs

Allow the user to enter text into all dropdowns and filter the dropdown accordingly.

Database

Can we use MongoDB instead of MySQL and not store data from multiple users in a single table or file? Create a separate database for each user or company.

Database backup option to users

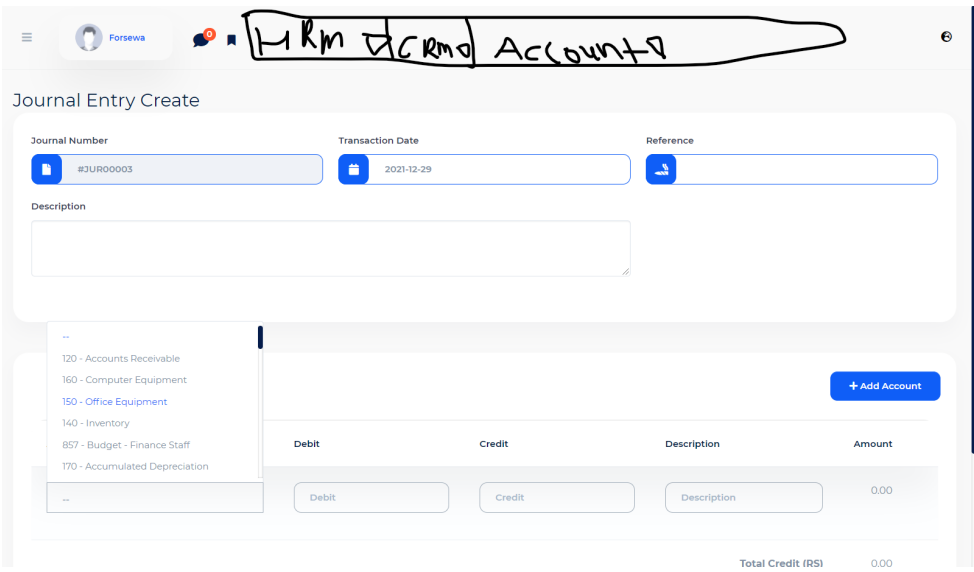

Remove option to delete the transaction and invoices

Create a cancelation option for transactions, bills, invoices and so on rather than deleting them.

Show an option for "Show Cancelled" Transactions, Bills, Invoices, Journals, and so on in Manage View.

When canceling a record, the system prompts the user for a reason for the cancellation and displays the Cancelled person's name.

CRM HRM Account tab in header

Inventory of products

Option to have stocks and inventory of items
